*Innovating for a Healthier World.*

# GMTA Perspective

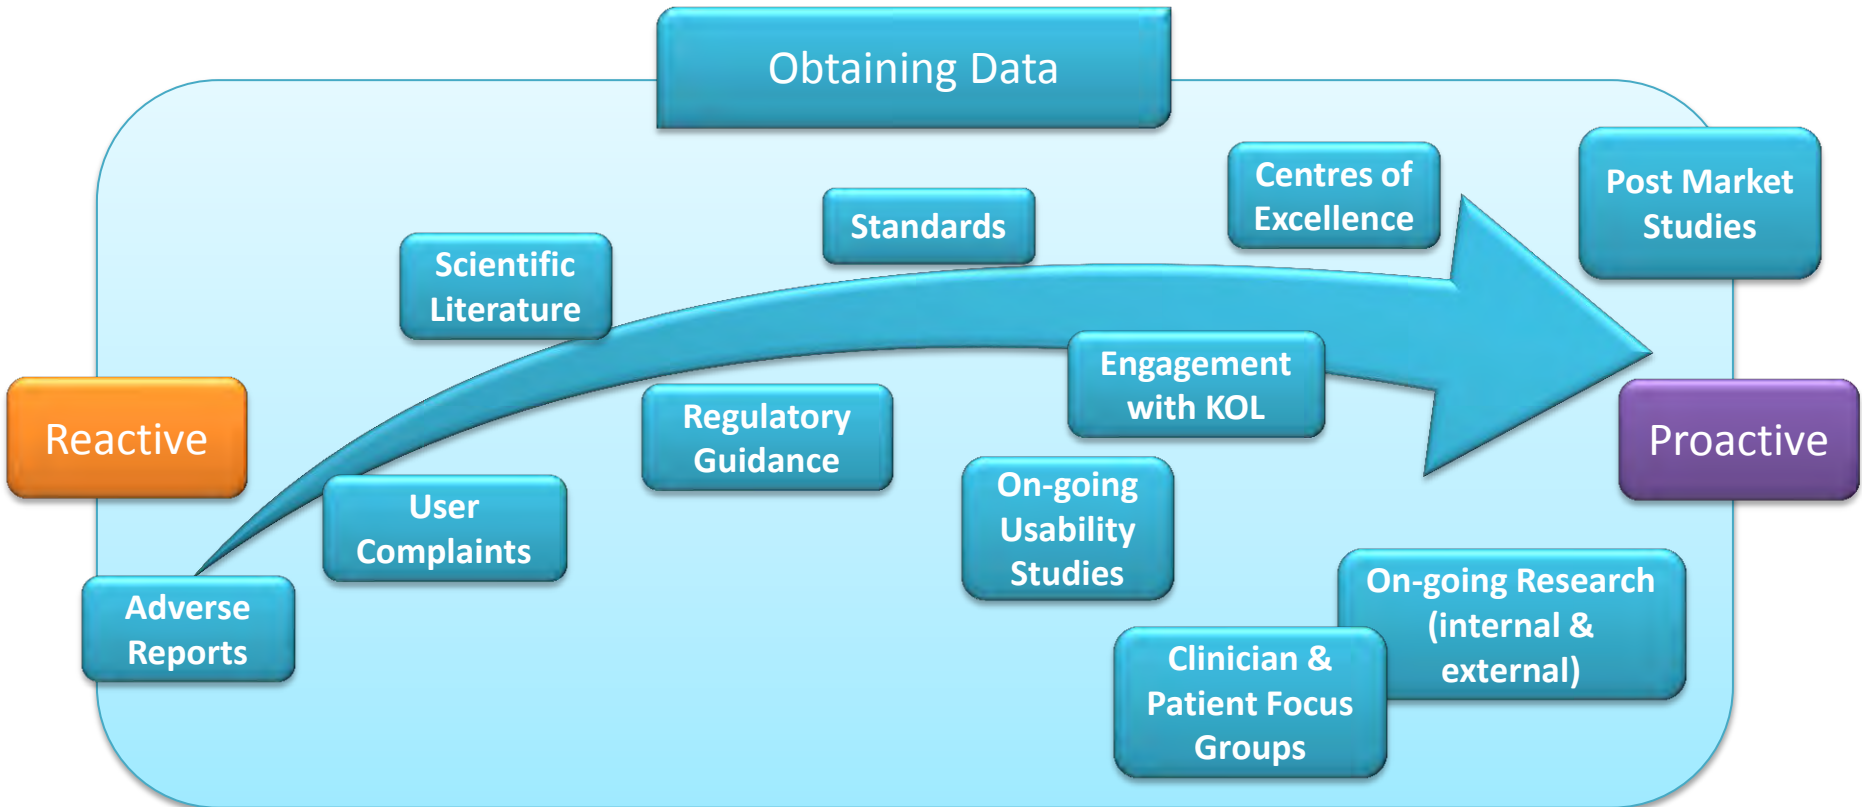

## Continuous improvement product safety and performance

IMDRF Open Session  
Brussels, 13 November 2013  
Jesús Rueda Rodríguez

# Health Systems – Focus on Quality of Care

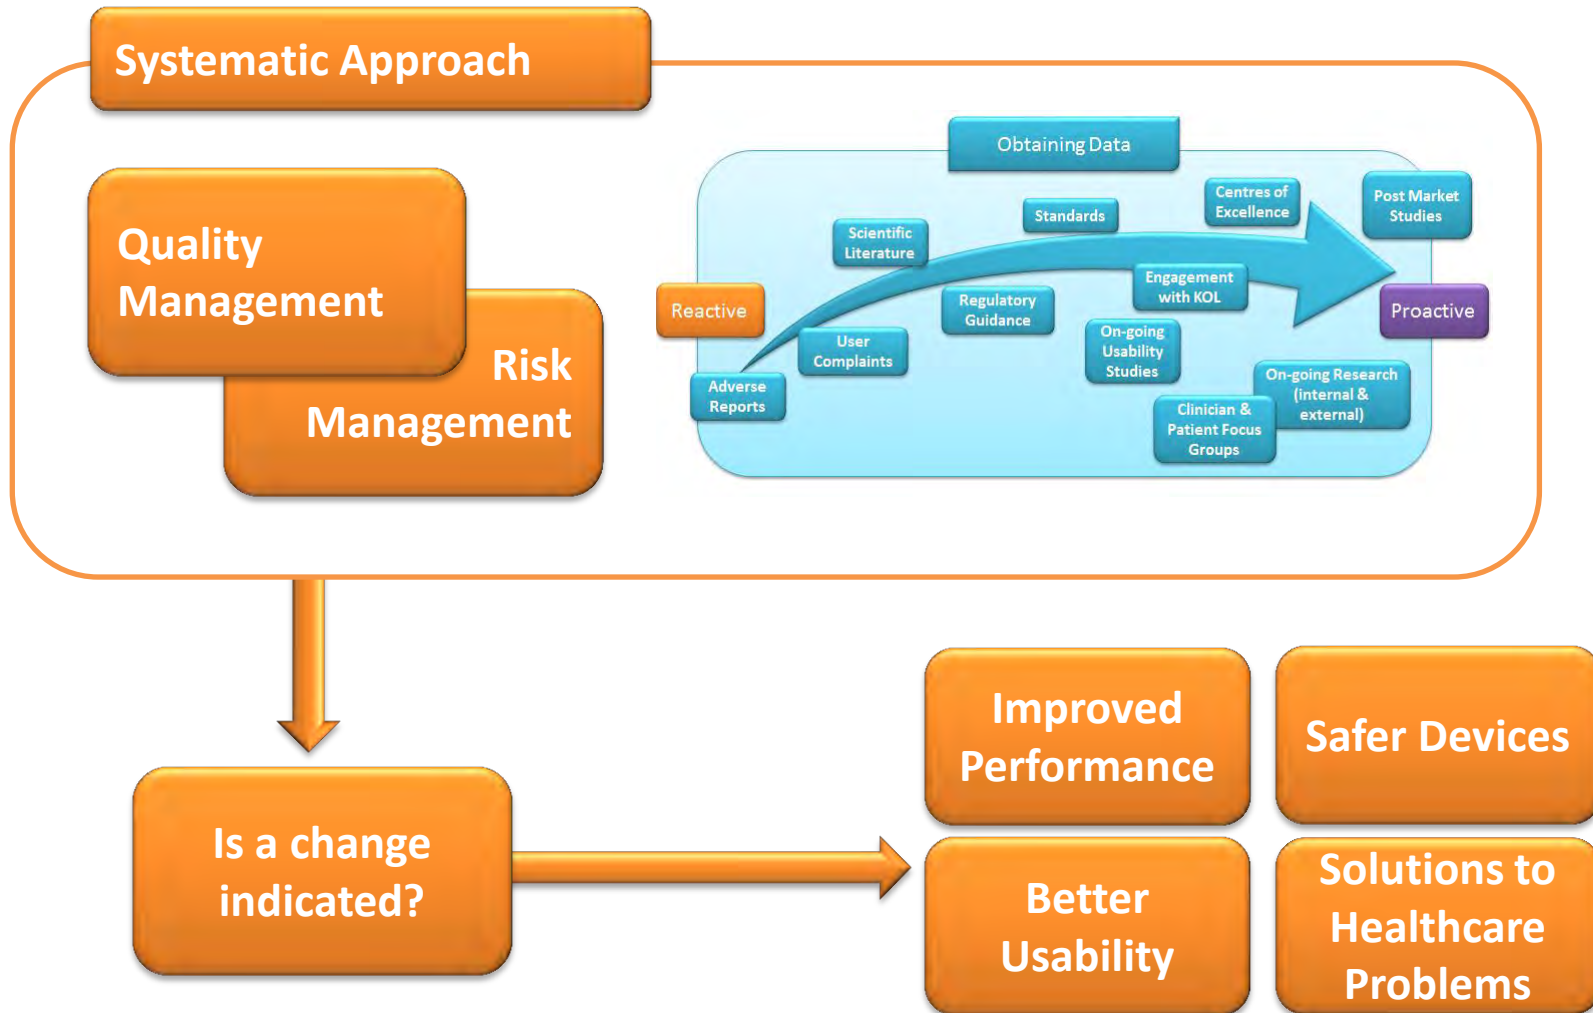

# Improving Safety and Performance of Medical Devices

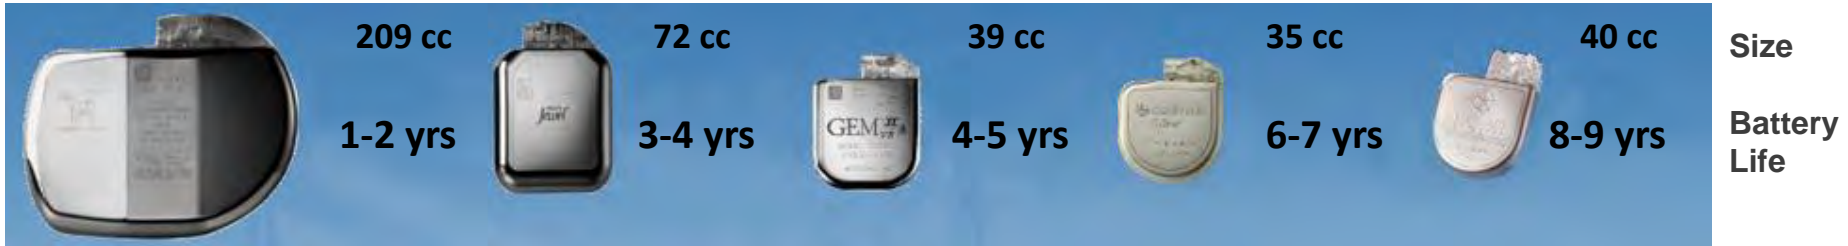

Patient focus groups and usability studies are of particular importance for devices intended for lay users

# Improving Safety and Performance of Medical Devices

# Examples – improving medical devices

Major increase in functionality

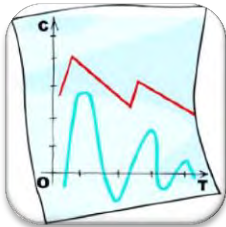

# Improving Safety and Performance of Medical Devices

## Conclusion

Through a Systematic Quality and Risk Management –  
Data Driven Approach

Collaborative approach with Health Care Systems
