

Artificial Intelligence/ Machine Learning Working Group Update

Working Group Chair(s):

Matthew Diamond, Food and Drug Administration, USA

Gabriela Commatteo, Medicines and Healthcare products Regulatory Agency (MHRA), United Kingdom

Updates from the IMDRF AI/ML Working Group

- “Technical Framework for Artificial Intelligence Life Cycle Management” document was submitted to the Management Committee on January 16th 2026 as a proposed document for public comment.
 - This document describes an internationally harmonized technical framework to help promote responsible innovation and patient-centricity by facilitating the secure, safe, ethical, and effective design, development, deployment, maintenance, use, and decommission of AI-enabled medical devices.
 - Proposed public comment duration – 90 days
- The WG also plans to begin exploring topics for new work items later this Spring to bring to MC later in the year
