

Digital Oncology: The role of IT-solutions in early cancer diagnostics Igor Philippov, Oncology Group Lead, Roche Diagnostics Rus

International Medical Device Regulators Forum, 16-19 September 2019, Yekaterinburg

National Healthcare Program 2019-2024 in Oncology

Proper framework needs to be established in order to succeed

Decrease cancer mortality

Increase fertility rate

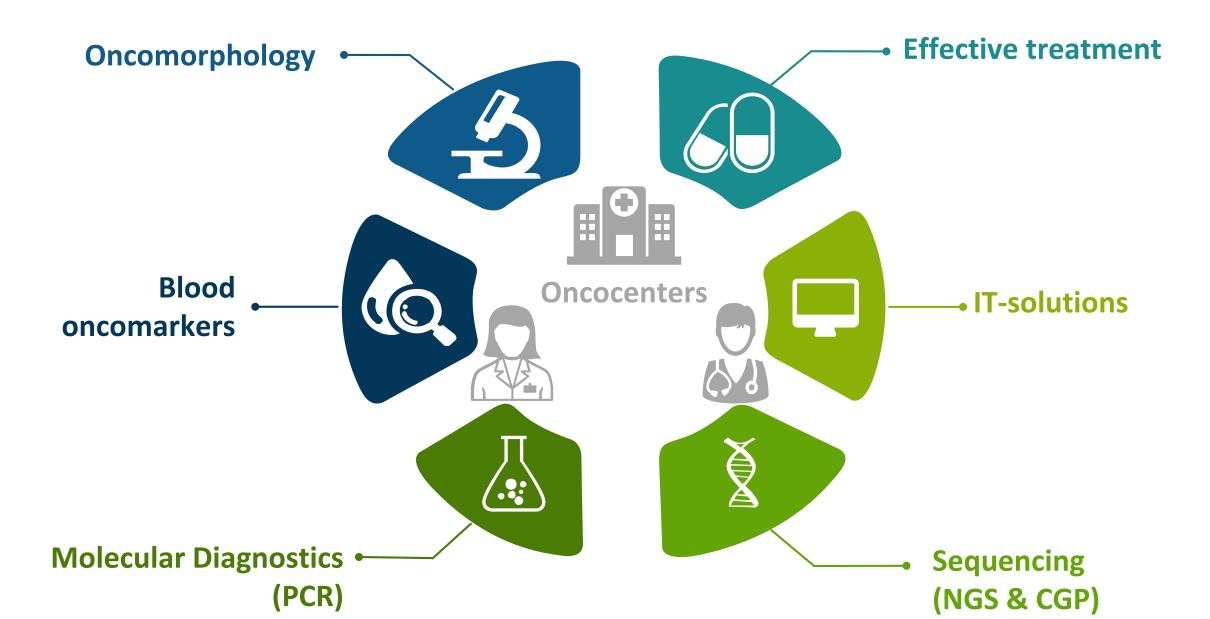

Significant Governmental investments (~ 976 bln RUB)

Focus on early diagnostic

Patient-centric approach

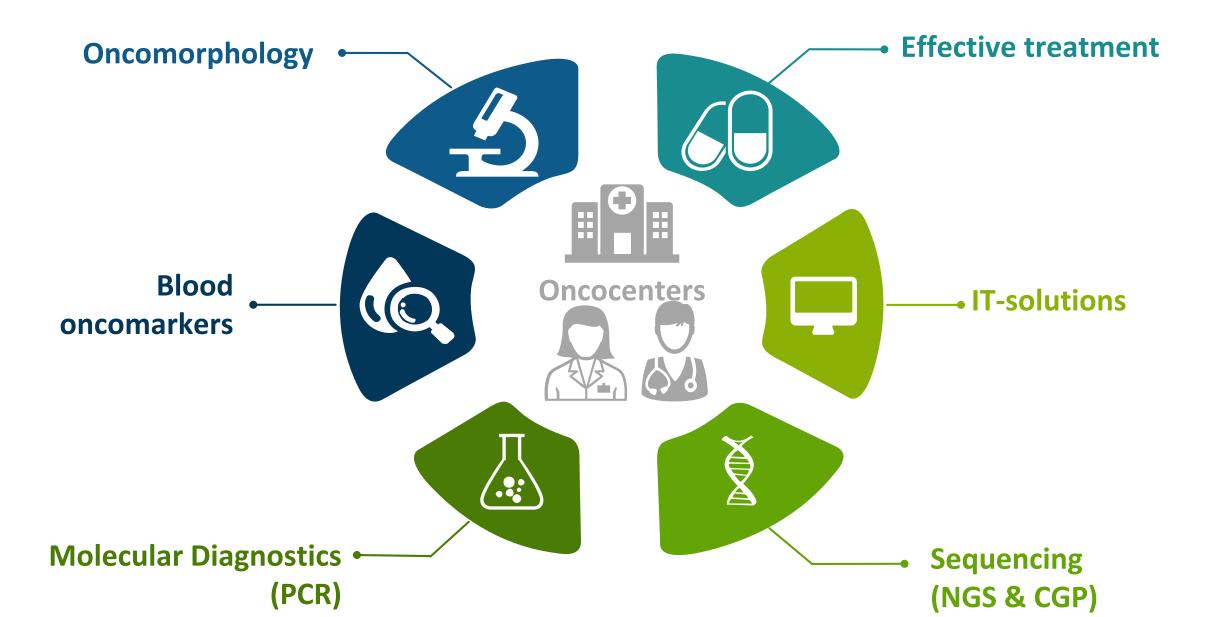

Patient's needs in Oncology requires multi-disciplinary approach

Patient-centric approach

Patient's needs in Oncology requires multi-disciplinary approach

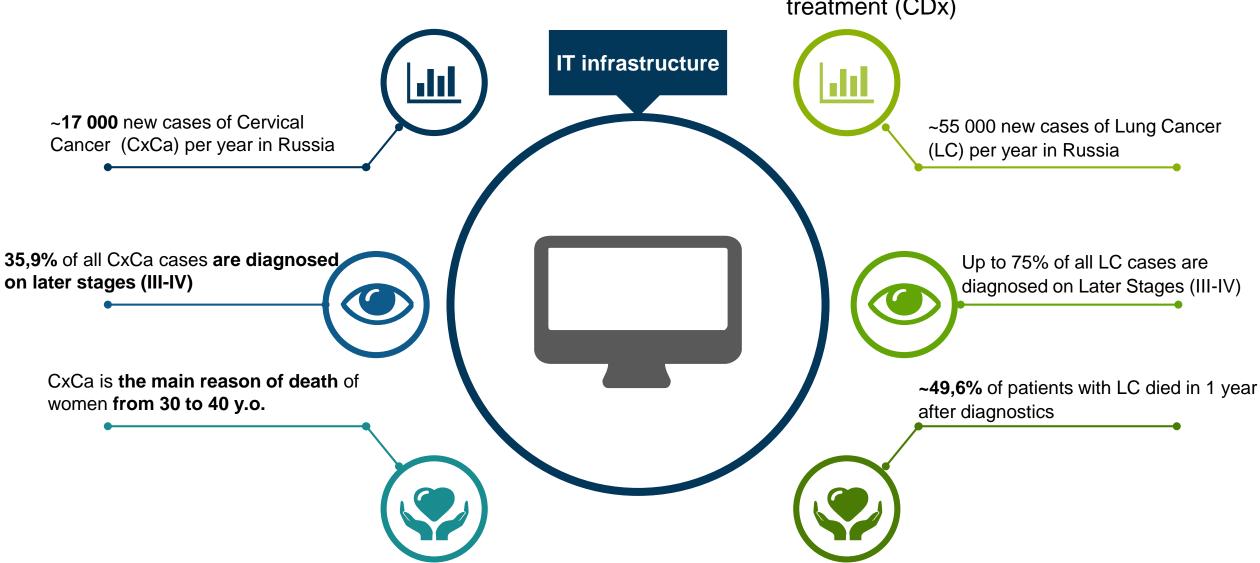

3 leveled (LBC, HPV Test, p16ki67 test) CxCa Screening Program

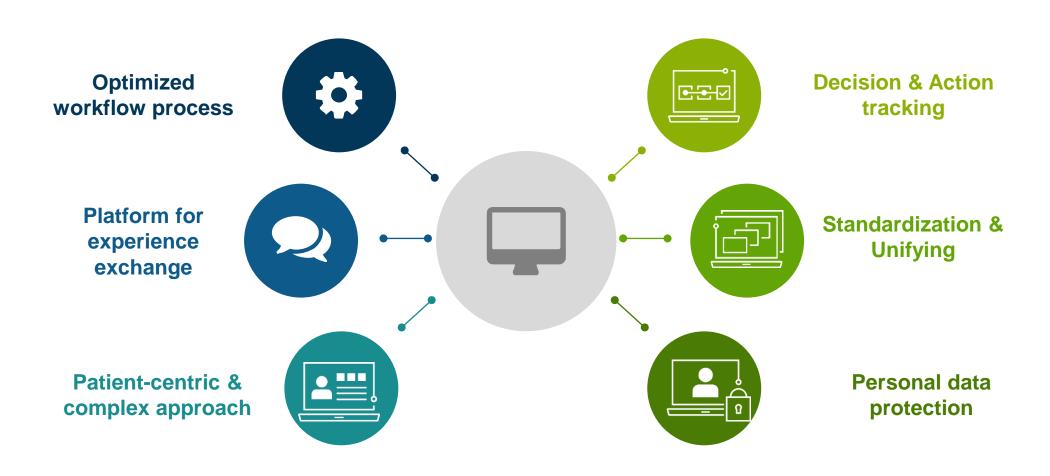

NGS Registration and development for LC early diagnostics and treatment (CDx)

Modern IT-solutions requirements

IT – solutions yes/no?

IT is about updates

New version = new registration?

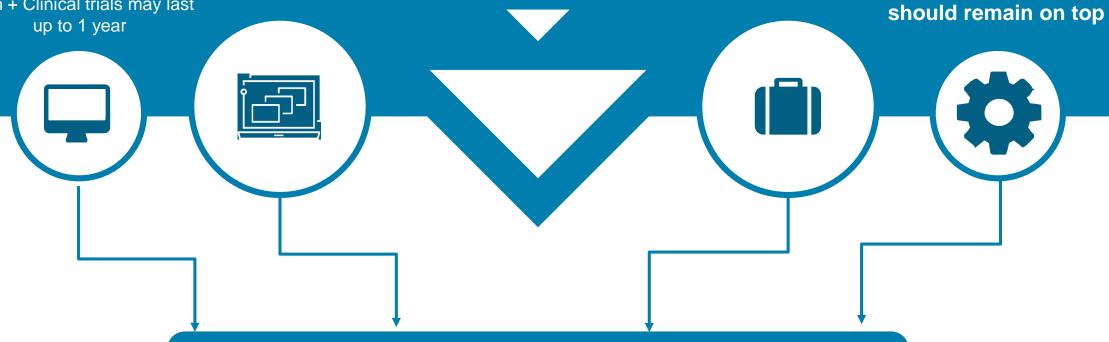

Are you up-to-date?

When all trials are done – you already old-fashioned

Quality and Safety

Timelines are crucial

Tech + Clinical trials may last up to 1 year

New approach needed

Russian Federal Law No. 323 with taking into account all features & requirements of software products used for medical purposes.

4 steps into CDx approach

Igor Philippov

Oncology Group Lead, Roche Diagnostics Rus

Doing now what patients need next
